Pamela J. Brandon, Administrator

Residents in Wisconsin Adult Correctional Facilities
on December 31, 1989

- Offenders classified as new admissions accounted for the majority of the males (80.8 percent) and females (89.2 percent) in residence in Wisconsin's correctional institutions for adults on December 31, 1989. This category includes those admitted as new sentences and those admitted as probation violators with or without new sentences.
(See Table 1, pps. 1-2, pps. 29-30.)
- Over one-half (53.1 percent) of the males were from White racial and ethnic backgrounds while approximately two-fifths (38.4 percent) were Black. The female resident population was nearly evenly divided between Whites (49.1 percent) and Blacks (47.7 percent).
(See Table 2, p.3, p.31.)
- Unarmed burglary (19.3 percent), armed robbery (9.1 percent), and first degree sexual assault (8.5 percent) were the major offenses for which males had most often been convicted and sentenced. Females were most frequently sentenced for forgery (16.4 percent), other drug offenses (13.2 percent), and theft (10.0 percent).
(See Table 3, pps. 4-7, pps. 32-34.)
- Slightly less than three-fifths (57.1 percent) of the males in residence were classified either as assaultive offenders or as assaultive, sex and/or drug offenders. Males categorized as sex offenders or also as drug and/or assaultive offenders made up one-fifth (20.6 percent) of the resident population while over one-tenth (12.2 percent) were classified as drug offenders either alone or in conjunction with assaultive and/or sex offenses. One-third (32.1 percent) of the males were property offenders.

Two-fifths (40.2 percent) of the females in residence were property offenders. Those classified either as drug offenders or additionally as assaultive offenders made up somewhat less than one-fifth (16.4 percent) of the population while those considered to be sex offenders made up only 1.8 percent of the group. Over two-fifths (42.3 percent) were classified, either solely or in combination with sex and/or drug offenders, as assaultive offenders.
(See Table 4, p.8, p.35.)
- Males in residence had an average (mean) sentence of 10.8 years while the average (mean) sentence for females was 6.6 years. Three hundred eighty-nine males and 19 females serving life sentences were excluded from these computations.
(See Table 5, p.9, p.36.)
- Over one-third of the males (36.9 percent) and females (34.2 percent) had been committed to the institutions from Milwaukee County. Four counties, Dane, Kenosha, Racine, and Rock, accounted for the commitment of one-fourth (26.8 percent) of the males and over one-third (35.2 percent) of the females.
(See Table 6, pps. 10-14, pps. 37-39.)

- Males, with an average (mean) age of 30.7 years, were approximately one year younger than females who had an average (mean) age of 31.6 years.
(See Table 7, p.15, p.40.)
- Wisconsin was the place of birth for over one-half of the males (54.8 percent) and females (54.1 percent) in residence.
(See Table 8, p.16, p.41.)
- Three-fourths (75.5 percent) of the males and two-thirds (65.1 percent) of the females were without any type of physical, emotional, or developmental disability.
(See Table 9, p.17, p.42.)
- Approximately one-fifth (17.3 percent) of the males and three females (1.1 percent) had a record of previous service in the military.
(See Table 10, p.18, p.43.)
- About one-third of the males (33.4 percent) and females (35.2 percent) had some degree of high school education but had not earned diplomas. GED certificates or high school diplomas had been received by over two-fifths (43.7 percent) of the males and three-tenths (31.3 percent) of the females.
(See Table 11, p.19, p.44.)
- A tested grade level of sixth grade or less was reported for somewhat less than two-fifths of the males (37.4 percent) and females (35.2 percent). Less than one-fourth of the males (22.8 percent) and females (23.1 percent) tested at or over the twelfth grade level.
(See Table 12, p.20, p.45.)
- Males had been in residence for an average (mean) of 26.5 months; females for 18.5 months.
(See Table 13, p.21, p.46.)
- Over one-third of the males were classified as close or maximum custody (34.5 percent) or as medium or medium out custody (35.8 percent). Slightly less than one-fourth (23.8 percent) were classified as minimum custody while the remainder (5.9 percent) were unclassified. One-fourth (24.6 percent) of the females were classified as maximum, one-fifth (21.4 percent) as medium or medium out, and almost one-half (45.2 percent) as minimum. Less than one-tenth (8.8 percent) were unclassified. The presence of individuals with maximum and medium security ratings in minimum security facilities is due to a time lag in reporting changes to the data system.
(See Table 14, p.22, p.47.)
- Three-fifths (60.7 percent) of the males and two-fifths (41.3 percent) of the females were found to have at least a moderate need for treatment for problems with the use of alcohol. Information was obtained from the inmate needs assessment system.
(See Table 15, p.23, p.48.)

- Involvement in some type of program for those with problems relating to the use of drugs was at least a moderate need for approximately two-thirds of the males (63.1 percent) and females (65.5 percent) in residence. Information was obtained from the inmate needs assessment system.
(See Table 16, p.24, p.49.)
- Four-fifths (81.7 percent) of the males and three-fourths (75.4 percent) of the females were found to have alcohol and/or drug problems. Information was obtained from the inmate needs assessment system.
(See Table 17, p.25, p.50.)
- At least a moderate need for treatment of some type of mental health problem was indicated for about one-fifth of the males (18.2 percent) and females (19.6 percent) in residence. Information was obtained from the inmate needs assessment system.
(See Table-18, p.26, p.51.)
- Enrollment in some type of educational program was found to be at least a moderate need for over one-half (53.3 percent) of the males and over three-fifths (62.3 percent) of the females. Information was obtained from inmate needs assessment system.
(See Table 19, p.27, p.52.)
- Test results indicated that over three-fourths of the males (76.5 percent) and females (76.9 percent) had moderate or serious needs for some type of vocational training program. Information was obtained from inmate needs assessment system.
(See Table 20, p.28, p.53.)

Offenders Admitted to
Wisconsin Adult Correctional Institutions
Calendar Year 1989

HIGHLIGHTS

- ° Seven out of 10 males (72.3 percent) and eight out of 10 females (85.5 percent) admitted during calendar year 1989 were classified as new admissions; a category which includes offenders who were not under any type of supervision prior to sentencing as well as those received as probation violators with or without a new sentence.

(See Table 1)
- ° Males were most often sentenced for unarmed burglary (20.9 percent), other drug violations (12.3 percent), and theft (6.6 percent). Other drug violations (17.9 percent), forgery (16.8 percent), and theft (13.8 percent) were the offenses for which females were most frequently sentenced.

(See Table 2)
- ° The average (mean) length of sentence for all offenders was 68.8 months. Males received average (mean) sentences of 70.3 months; females sentences of 43.8 months. Twenty-six males and two females who received life sentences were excluded from these computations.

(See Table 3)
- ° Commitments from Dane, Kenosha, Rock, and Racine Counties accounted for over one-fourth (27.0 percent) of the males and two-fifths (40.3 percent) of the female admissions. Over one-third (35.9 percent) of the males and three-tenths (30.1 percent) of the females were committed from Milwaukee County.

(See Table 4)
- ° Males convicted of unarmed burglary, other drug violations, and theft received average (mean) sentences of 58.8, 46.5, and 48.9 months. The average (mean) length of sentence received by females convicted of other drug violations, forgery, and theft were 37.9, 50.1, and 36.3 months.

(See Table 5)
- ° One-fourth (24.1 percent) of the males were assaultive offenders, an additional tenth (13.6 percent) were both assaultive and sex offenders, while assaultive drug offenders and assaultive, sex, and drug offenders made up 1.2 percent of the admissions. Females classified solely as assaultive offenders made up one-fourth (25.0 percent) of the group; two percent were categorized as both assaultive and sex offenders, with one (0.5 percent) classified as an assaultive and drug offender. Somewhat less than one-fifth (16.2 percent) of the males and over one-fifth (22.4 percent) of the females were classified solely as drug offenders.

(See Table 6)
- ° The average (mean) age for all offenders was 28.0 years. Males, with an average (mean) age of 27.9 years, were almost a year younger than females who had an average (mean) age of 28.8 years.

(See Table 7)

- ° About one-half (52.0 percent) of the males and less than one-half (46.9 percent) of the females were from White racial and ethnic backgrounds.
(See Table 8)
- ° Two-thirds (65.1 percent) of the males and one-half (50.5 percent) of the females had never been married.
(See Table 9)
- ° No prior felony convictions other than those associated with this admission were found for over one-half of the males (52.5 percent) and females (56.1 percent) admitted in 1989. Almost one-fourth (23.5 percent) of the males and over one-tenth (13.3 percent) of the females had a record of two or more prior felonies.
(See Table 10)
- ° This was the first period of confinement in a penal institution for over one-half (53.6 percent) of the males and almost three-fourths (72.4 percent) of the females. Over one-third (35.6 percent) of the males and less than one-fifth (16.8 percent) of the females had previously been confined in Wisconsin correctional facilities.
(See Table 11)
- ° One-fourth (26.8 percent) of the males and one-tenth (10.2 percent) of the females had a record of prior stay in a correctional institution for juvenile offenders.
(See Table 12)
- ° More than two-fifths (44.3 percent) of the males and almost one-half (48.0 percent) of the females had not yet earned a high school diploma. However, three-tenths (30.0 percent) of the males and almost one-fifth (17.9 percent) of the females had earned GED or HED certificates prior to this admission.
(See Table 13)
- ° Testing indicated that two-fifths of the males (40.2 percent) and females (37.8 percent) ranked at or below the sixth grade level. A rank of at least the twelfth grade level was recorded for one-fourth (26.4 percent) of the males and one-fifth (20.4 percent) of the males and one-fifth (20.4 percent) of the females.
(See Table 14)
- ° Seven out of 10 males (71.7 percent) and six out of 10 females (63.3 percent) were found to be without physical, developmental, or emotional disabilities.
(See Table 15)
- ° A record of military service was noted for over one-tenth (15.1 percent) of the males and one (0.5 percent) of the females.
(See Table 16)
- ° About one-half (53.5 percent) of the males and two-fifths (39.8 percent) of the females received an initial custody classification of medium or medium out following the completion of assessment and evaluation procedures.
(See Table 17)

° Almost one-half (45.7 percent) of the males were placed in maximum security facilities following completion of assessment and evaluation procedures, one-third (32.0 percent) in medium security facilities, and nearly one-fifth (17.5 percent) in minimum security facilities. About three-fifths (57.7 percent) of the females were placed in a maximum-medium facility while two-fifths (39.8 percent) were placed in minimum security facilities.

(See Table 18)

° Four out of 10 males (61.8 percent) and over one-third (36.2) of the females were in serious need of treatment for alcohol problems.

(See Table 19)

° About seven-tenths (69.1 percent) of the males and females (65.8 percent) were in serious need of treatment for problems with drug usage.

(See Table 20)

° A need for treatment of problems relating to the use of alcohol and/or other drugs was noted for eight out of 10 males (81.8 percent) and seven out of 10 females (71.4 percent).

(See Table 21)

° About one-half (53.2 percent) of the males and three-fifths (61.7 percent) of the females were found to have need for an opportunity to become involved in some type of educational program.

(See Table 22)

° About one-fourth of the males (24.7 percent) and females (22.4 percent) were seriously in need of some type of vocational training.

(See Table 23)

° The majority of the males (84.5 percent) and females (87.2 percent) were found, after assessment and evaluation, to be without need for any type of services relating to mental health problems.

(See Table 24)

° Participation in drug and alcohol programs, other therapy programs, and educational programs were the placements most frequently recommended for males and females following completion of the assessment and evaluation process.

(See Table 25)

**CALENDAR YEAR SUMMARY REPORT
OF POPULATION MOVEMENT
1989**

This publication provides the reader with summary information about the volume and movements of offenders in the custody of the Division of Corrections, now Department of Corrections, during calendar year 1989. It is a compilation of data originally published on a monthly basis in Statistical Bulletin C-59, Report of Wisconsin Corrections Population.

Tables included in this report are:

Table 1	Admissions to and Separations from Facilities for Adults
Table 2	Admissions to and Separations from Facilities for Juveniles
Table 2-A	Youth Aids Summary Report
Table 3	Probation and Parole Services - Active Cases
Table 4	Probation and Parole Services - Absconders

HIGHLIGHTS - TOTAL POPULATIONS

- On December 31, 1989, a total of 41,817 offenders were under the supervision of the Division, now the Department of Corrections; an increase of 10.5 percent over the 37,849 offenders under supervision on January 1, 1989.
- The average daily population under state corrections supervision in Wisconsin rose 6.6 percent from 32,754 in calendar year 1988 to 34,929 in calendar year 1989.
- During the past five years average daily population under supervision have increased 19.1 percent, from 29,326 in calendar year 1985 to 34,929 in calendar year 1989.

HIGHLIGHTS - ADULT INSTITUTION POPULATIONS

- ° Adult institution population data includes information about offenders serving Wisconsin sentences in federal facilities, a Minnesota state prison, and in Wisconsin county jails. Information about offenders confined in these contract facilities appears in a column labeled "Contr Facil." (See Table 1)
- ° Offenders serving sentences at the Wisconsin Resource Center, an institution operated by the Department of Health and Social Services, Division of Care and Treatment Facilities, are not included in this publication.
- ° The population resident in correctional institutions for adult offenders increased 7.2 percent from 6,014 at the beginning of the year to 6,445 at the close of calendar year 1989. (See Table 1)
- ° The number of males resident in correctional facilities for adults rose from 5,747 at the start to 6,164 at the end of calendar year 1989; an increase of 7.3 percent. During the same time period the female resident population increased 5.2 percent from 267 to 281. (See Table 1)
- ° The average daily population of offenders confined in correctional facilities for adults rose from 4,876 in 1985 to 6,220 in 1989; a high for the five-year period and an increase of 25.3 percent. (See Table A)

HIGHLIGHTS - COMMUNITY SUPERVISION POPULATIONS

- ° Community supervision cases increased 11.5 percent from 27,033 in January to 30,155 at the end of 1989. (See Table 3)
- ° The number of community services cases placed on absconder status in calendar year 1989 increased 8.6 percent from 4,272 to 4,639. (See Table 4)

1989	34,929	28,152	24,207	23,528	1	-	678	3,945	3,510	-	169	266	6,777	6,220	557

* Average daily populations for the Wisconsin Resource Center, operated by the Division of Care and Treatment Facilities, have been excluded from this table. Average daily populations for WRC for calendar years 1985 - 1989 were 157, 162, 162, 159, and 160.

- ° The average daily population of offenders under community supervision rose steadily from 23,919 in 1985 to 28,152 in 1989; an increase of 17.7 percent. (See Table A)
- ° Probation supervision average daily populations increased 18.6 percent from 20,403 in 1985 to 24,207 in 1989. (See Table A)
- ° The average daily population of offenders under parole supervision rose 12.2 percent from 3,516 in 1985 to 3,945 in 1989. (See Table A)
- ° There was an overall increase of 10.8 percent in adult parole supervision resident populations from 3,167 in 1985 to 3,510 in 1989.
- ° The largest increase, 4.7 percent, during the five year period occurred between 1987 when the average daily population of adult parole supervision cases was 3,302 and 1988 when an average daily population of 3,456 was reported. (See Table A)
- ° Juvenile aftercare average daily populations, which were at a five year high of 190 in calendar year 1986, decreased 14.2 percent to 163 in calendar year 1988, and then increased 3.7 percent to 169 in calendar year 1989. (See Table A)
- ° The repeal of the Youthful Offender Statute, effective July 1, 1978 and a Department of Health and Social Services policy decision to discontinue provision of juvenile probation services on a state level are the factors that account for the almost complete disappearance of cases in these categories. (See Table 3, Table A)

HIGHLIGHTS - JUVENILE INSTITUTION POPULATIONS

- ° The population resident in correctional institutions for juvenile offenders rose from 530 at the beginning of calendar year 1989 to 578 at the end of the year; an increase of 9.1 percent. (See Table 2)
- ° Information about juvenile institution populations and the Youth Aids program will not appear in subsequent editions of this publication. Since January 1, 1990, juvenile correctional facilities are the responsibility of the Department of Health and Social Services' new Division of Youth Services, Bureau of Residential Institutions.

* Department of Corrections cases in residence at the Wisconsin Resource Center (rated bed capacity-160) are not included in Table 1. WRC population on January 1, 1989 was 160 and the population on December 31, 1989 was 162. WRC calendar year 1989 average daily populations including and excluding medical hospital were 160; the average daily population including beds held was 161.

** Atherton Correctional Center, a facility for females, opened on September 11, 1989 with a projected bed capacity of 50. The bed capacity on December 31, 1989 was 46.

Offenders Released From
Wisconsin Adult Correctional Institutions
Calendar Year 1989

HIGHLIGHTS

- A total of 3,016 persons, 2,841 males and 175 females, were released from Wisconsin's correctional institutions for adult offenders during calendar year 1989. The majority (71.8 percent) of those leaving the institutions were classified as first releases, almost one-fourth (22.4 percent) as re-releases, with those released after completion of an alternative to revocation placement (5.4 percent) or after completion of a revocation hearing (0.4 percent) making up the remainder of the group.

(See Table 1.)
- The bulk of the releases (88.0 percent) left the institution for supervision in the community on parole (27.5 percent), mandatory release (55.3 percent), or special action early release (5.2 percent) status. The remainder of the releases were discharged at completion of sentence (5.1 percent), discharged by court order (0.9 percent), or for other reasons (6.0 percent).

(See Table 2.)
- Males first and re-released during 1989 had most often been sentenced for unarmed burglary (27.0 percent), theft (7.5 percent), and other drug violations (7.4 percent). Forgery (19.4 percent), theft (17.1 percent), and other drug violations (10.9 percent) were the offenses for which females first and re-released during 1989 had most often been sentenced.

(See Table 3.)
- Males released during 1989 were serving average (mean) sentences of 63.9 months; females, 50.9 months. The average (mean) sentence for all offenders released in 1989 was 63.1 months. Six males serving life sentences were excluded from these computations.

(See Table 4.)
- Over one-third of the males (35.9 percent) and females (34.3 percent) had been committed to the institutions from Milwaukee County. An additional one-fourth (23.7 percent) of the males and one-third (33.7 percent) of the females had been committed from Dane, Kenosha, Racine, and Rock Counties.

(See Table 5.)
- The average (mean) length of stay since most recent admission for all offenders released in 1989 was 24.0 months. Males had an average (mean) length of stay of 24.4 months; females, 19.1 months.

(See Table 6.)

- Offenders re-released in 1989 had spent, since last new admission, an average (mean) of 54.2 months in the institution. Males spent an average of 55.0 months; females, 33.9 months.
(See Table 7.)
- One-fifth (21.8 percent) of the males and over one-tenth (12.0 percent) of the females re-released during 1989 had a record of at least two prior releases to the community.
(See Table 8.)
- More than one-half of the males (55.8 percent) and females (51.4 percent) released in 1989 were from White racial and ethnic backgrounds.
(See Table 9.)
- One-half (49.7 percent) of the males released were classified as property offenders, another one-fourth (25.7 percent) as assaultive offenders, and one-tenth (10.2 percent) as drug offenders.
(See Table 10.)
- Females categorized as property offenders made up approximately three-fifths (58.9 percent) of the releases, assaultive offenders one-fourth (21.7 percent), and drug offenders less than one-fifth (15.4 percent).
(See Table 10.)
- Less than one-tenth of the males (5.5 percent) and females (3.4 percent) were released on outstanding detainers to authorities from other states.
(See Table 11.)
- Less than one-fifth (16.8 percent) of the males and one-fourth (25.7 percent) of the females took part in some type of Adult Basic Education program prior to release.
(See Table 12.)
- Records indicate that over one-tenth (13.0 percent) of the males and over one-fourth (26.9 percent) of the females participated in programs leading to GED or HED certificates.
(See Table 13.)
- The majority of the males (71.3 percent) and females (81.7 percent) did not take part in high school education programs prior to release. However, twenty-one males and five females earned high school diplomas prior to being released.
(See Table 14.)
- Over one-fourth (27.4 percent) of the males and almost one-half (45.7 percent) of the females took part in programs for offenders with problems relating to the use of alcohol and/or other drugs.
(See Table 15.)
- One-fifth (21.9 percent) of the males and less than one-tenth (7.4 percent) of the females had work release experience during this period of incarceration.
(See Table 16.)

- Thirty-seven males (1.3 percent) took part in some type of study release placement prior to leaving the institution. None of the females released during 1989 had participated in a study release program while incarcerated.

(See Table 17.)
- Nearly one-fourth (23.1 percent) of the males and over one-tenth (13.1 percent) of the females were enrolled in some type of vocational or apprenticeship training program prior to release.

(See Table 18.)
- Ninety-two males (3.4 percent) and fourteen females (8.0 percent) were enrolled in college courses while institutionalized.

(See Table 19.)
- Males serving sentences for unarmed burglary, other drug violations, and theft, which were the crimes for which males first-released in 1989 had most often been sentenced, spent an average (mean) of 23.3, 18.0, and 19.4 months respectively in the institution.

(See Table 20.)
- First-released females, who were most often sentenced for forgery, theft, and other drug violations spent an average (mean) of 16.8, 17.6, and 14.8 months in the institution.

(See Table 20.)
- Males serving sentences for the most common offenses among those re-released in 1989 (unarmed burglary, armed robbery, theft) served an average (mean) of 18.0, 33.6, and 15.2 months between the time of reinstitutionalization and release.

(See Table 21.)
- Females serving sentences for forgery, unarmed burglary, and theft spent an average (mean) of 9.7, 12.2, and 19.3 months in the institution prior to re-release.

(See Table 21.)
- First-released males who were serving five year sentences spent an average (mean) of 27.9 months in the institution; first-released females with five year sentences, an average (mean) of 22.9 months.

(See Table 22.)
- Males and females with five year sentences who were previously released and returned to the institution following revocation of field supervision spent an average (mean) of 14.9 and 12.0 months in the institution prior to re-release in 1989.

(See Table 23.)

- Eight out of 10 males (83.3 percent) and six out of 10 females (59.4 percent) released during 1989 planned to live in Wisconsin, while over one-tenth (12.1 percent) of the males and almost two-fifths (37.7 percent) of the females intended to live elsewhere in the United States.

(See Table 24.)
